

NASA STTR 2007 Phase I Solicitation

T4 Innovative Sensors, Detectors and Instruments Technology Needs for Earth Science, Space Science and Exploration

This topic solicits innovative sensors, detectors and instruments that support the research in Earth and its environment, the solar system, and the universe through observations from space. To assure that our Nation maintains leadership in this endeavor, we are committed to excellence in scientific investigation, in the development and operation of space systems, and in the advancement of essential technologies.
