

National Aeronautics and Space Administration (NASA) Small Business Innovation Research (SBIR) Ignite Solicitation

I-CORPS INTEREST FORM

I-Corps Interest Form

- Go to <https://sbir.nasa.gov/content/I-Corps> to learn more about the I-Corps Program from NASA SBIR/STTR.
- Please review the requirements for the I-Corps Cohort before opting in for the program. If one or more team members cannot meet the requirements, the team should not pursue the program.
- In the event a large number of offerors express interest, the Government reserves the right to limit the number of offerors invited to submit I-Corps proposals based upon the Government's assessment of the initial summary statements.

If selected for a Phase I award, does the SBC plan to participate in I-Corps? (Note: Regardless of the answer, all SBIR/STTR Phase I awardees are eligible to participate in the I-Corps Program.)

Yes No

Has the SBC previously participated in I-Corps programs offered by other Federal agencies?

Yes No

What is the SBC's current business strategy for revenue growth? (Note: Any selection is acceptable for participation in I-Corps.)

- Revenue growth through technology research, development, and consulting only
- Revenue growth through supplying or supporting the government and/or prime contractors
- Revenue growth by licensing patented innovations
- Revenue growth through the capture of a growing market and the sales of products

Provide numerical values for the following questions related to SBC company size.

How many employees does the SBC currently employ?

What is the estimated intended growth (if any) in the number of employees employed by the SBC three years from now?

Additional Information

If you answered **yes** to the question above, you are required to complete the remainder of this form.

The SBC is aware that I-Corps teams will participate in an entrepreneurial immersion course that will require each team participant to invest in a minimum of 15 to 20 hours of time per week.

Yes No

The SBC is able to provide substantial commitment of time and effort to successfully participate. If one or more team members cannot meet the requirements, the team should not pursue the program.

Yes No

The SBC is aware that I-Corps specifically targets efforts to commercialize technologies within the private sector.

Yes No

Provide a short statement explaining why the company believes its SBIR/STTR technology or company would benefit from participating in I-Corps.
